

**HYBRID CLICK LOCK**  
LONGBOARD AND HERRINGBONE

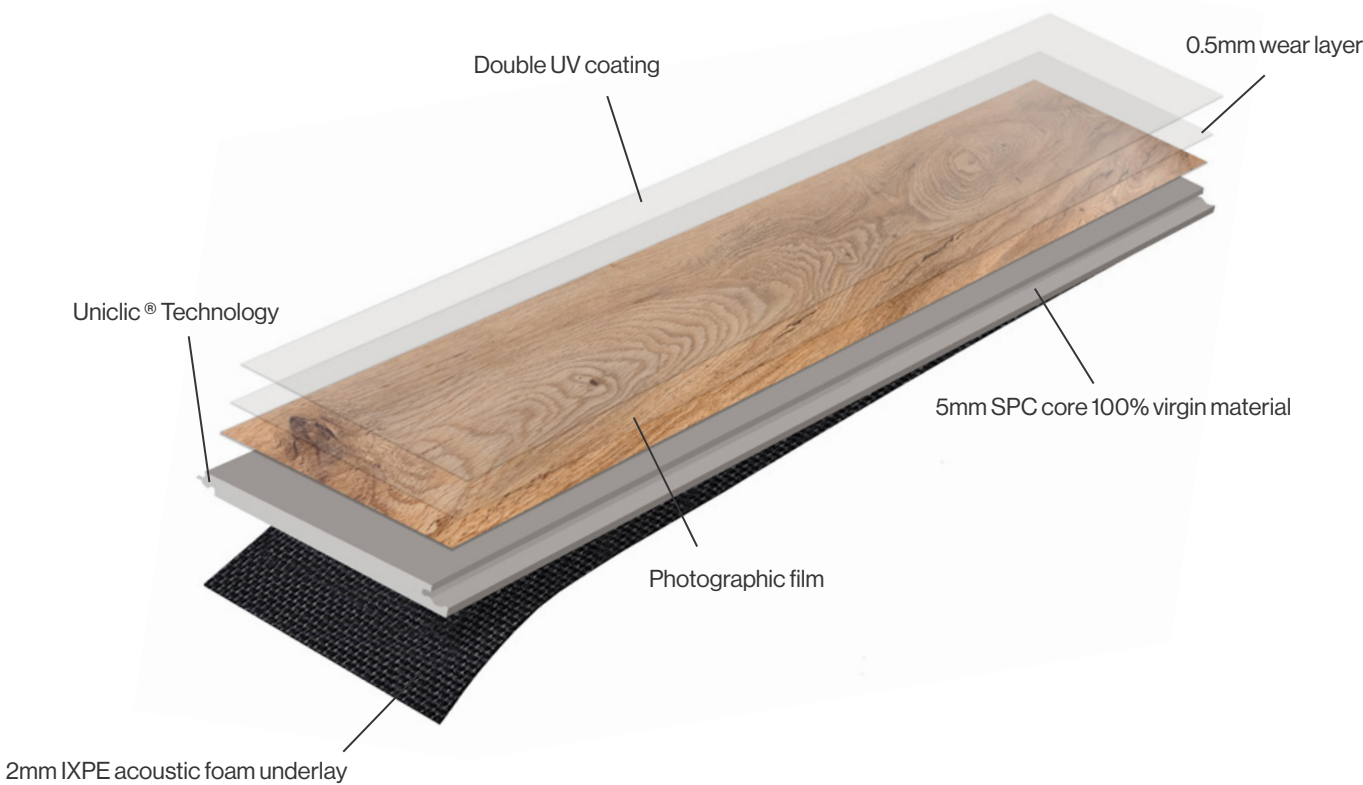

# HYBRID CLICK LOCK

Serfloor's Engineered Hybrid Click Lock range is a revolutionary flooring system composed of a combination of natural limestone and PVC powder, which ensures dimensional stability. The key features of this range include the Uniclic® system and the acoustic backing, making it an ideal choice for your next commercial project.

Backed with a 30 year residential and 15 year commercial wear warranty, it is an ideal option for high traffic areas for both your home and workplace. All these features will guarantee you enjoy a beautiful floor for many years to come.

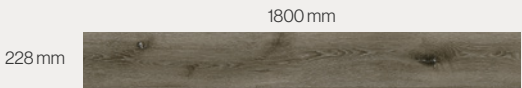

With 22 realistic wood designs to choose from, Serfloor's Hybrid Click Lock will bring both elegance and sophistication to any space of your home or workplace.

- Low VOC emissions contribute to better indoor air quality
- Durable & low maintenance
- Suitable for under floor heating
- Double UV Coating
- Quick & easy installation
- Best choice for allergy sufferers
- Fire, slip, oil & stain resistant
- Pet and kid friendly
- Water Resistant
- Reduces impact & sound travel
- Designed for no extra underlay
- Suitable for all wet areas including the bathroom, laundry and kitchen
- Antibacterial
- Virgin Material
- Uniclic System

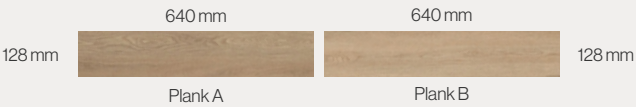

## Hybrid Longboard

With 22 realistic wood designs to choose from, Serfloor's Engineered Hybrid Longboard will bring both elegance and sophistication to any space of your home or workplace. The extra long plank size is guaranteed to open up and enhance the look of your room.

## Hybrid Herringbone

Offering 4 stunning traditional colours, Serfloor's Hybrid Herringbone creates an artistic and elegant appearance within your space. With its ideal plank size, consisting of an A and B click, Serfloor's Hybrid Herringbone will add luxury and class to any area.

# HYBRID CLICK LOCK

## LIMESTONE CORE

The composition of our Hybrid Click Lock makes it the best option compared to vinyl, timber laminate or engineered timber.

- Minimal expansion when exposed to temperature changes
- Dimensionally stable compared to timber or vinyl
- 100% waterproof
- Easy to cut with a stanley knife
- Impact resistant
- Suitable for under floor heating (up to 80°C)
- Virgin material

## PROTECTIVE WEAR LAYER

Serfloor's Hybrid Click Lock is designed for everyday use and is a perfect solution for any area of your residential home or commercial space.

- Double UV protection
- Scratch resistant, making it suitable for kids and pets
- Most stains can be removed quickly without leaving traces, including permanent marker
- 30 years Residential wear warranty
- 15 years Commercial wear warranty

Spotted Gum SFC-131

## COMMERCIAL GRADE

With a 0.5mm wear layer and double UV protection, you can rest assured that this product is a perfect option for your next commercial project.

- 0.5mm wear layer
- 15 years commercial wear warranty
- 100% waterproof
- Softer underfoot compared to ceramic tiles or timber floors
- Easy to maintain and keep clean

## ACOUSTIC PROPERTIES

With great acoustic properties, Serfloor's Hybrid Click Lock is suitable for use in all apartment buildings.

- Sound insulation rating of 46 (L'nT,w)
- 2mm IXPE acoustic foam underlay
- Suitable for use in apartment buildings without the need for extra underlay
- Reduces impact sound when walked on
- No tapping sound compared to timber laminate

Black Distressed Oak SFC-110

Rustic Oak SFC-101

## CUSTOM STAIR NOSE

Serfloor Australia is one of the first suppliers in Australia to introduce custom made stair nosing produced in house from our own hybrid longboard planks.

- Perfect match to your floor
- Clicks into your floor for a seamless finish
- Made to order to ensure same batch
- R10 / P3 slip rated
- Available in 50mm square nose or flush stair nose
- 1.4m length stair nose

## FLOATING FLOOR

With its patented click system, Serfloor's Hybrid Click Lock range is designed to be installed without glue, making it easy to install and repair.

- No adhesive required during installation
- Expansion gap required, can be covered with Serfloor's matching waterproof scotia
- Must be able to move freely, without heavy weight on top (such as kitchen benches, piano, or heavy bookshelves)
- Matching waterproof scotia to cover the expansion gap

## WATERPROOF

The composition of our Hybrid Click Lock in combination with the Uniclic system makes this product perfect for wet areas.

- 100% waterproof
- Suitable for use in all wet areas including the bathroom, kitchen and laundry
- Water tight joins
- Matching waterproof scotia suitbale for use in wet areas

## UNICLIC® TECHNOLOGY

The combination of the Uniclic Technology and micro-bevelled edges ensures you enjoy a beautiful floor for many years to come.

- Strongest click system in the market
- Withstands greater forces in comparison to other click systems
- Designed for commercial applications
- Seamless joins
- Reduces the risk of warping, cupping, or gapping

### Colour and Pattern Reproduction

Serfloor photography and print cannot always produce a perfect representation of our product. This includes the appearance of colour, pattern variation and installation elements used. For this reason, we strongly recommend you obtain a product sample and view the product in a larger display where possible, to see the flooring design in a large-scale setting before purchase and installation. Just like real timber, the patterns in our products can have natural variations.

The colour and pattern trends do change and in order to continue supplying our customers with the latest colours and styles, products and colours are sometimes discontinued. If this happens, we will always do our best to help you find a colour and pattern you will love just as much. We suggest visiting our website for information about installation, care and maintenance [www.serfloor.com.au/floorcare](http://www.serfloor.com.au/floorcare).

If you don't find what you are looking for or require more information, please contact us directly.
